DETAILED ACTION

Status of The Claims

Claims 1-13, 17, 19 have been canceled. Claims 14-16, 18, 22-28 have been amended. New claim 29 has been added. Currently, claims 14-16, 18 and 20-29 are under Examination. The said claims have been re-numbered as claims 1-14.

Allowance

The following is an examiner's statement of reasons for allowance: In claims 1-14 Applicants claim a process for the dihydroxylation of olefins using transition metal catalysts and wherein the an amine is required to achieve improved selectivity.

No prior art disclosing or suggesting the instant invention was found. The closest art was found in MacLean et al US patent 3317592 (1967).

MacLean discloses an oxidation process comprising the oxidation of olefins to glycols by osmium tetra oxide in alkaline solutions having pH from 7.5 to 12 and wherein the oxidant agent is molecular oxygen (see col. 2, lines 15 to 32). McLean's process however does not disclose or suggest the use of an amine as an element of the said process.

CONCLUSION

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

All post-Allowance Correspondence concerning this Application must be mailed to:
